

NCERA216 /SERA 37 Webinar Series

Intercultural Competency Inventory and Project Implicit.

By **Dave Lassen, MA.**

Join us **February 8, @1:30pm CST / 2:30pm EST**

In today's increasingly interconnected world, professional and civic success requires the ability to effectively navigate multicultural settings.

Existing research indicates that diverse groups perform better than their monocultural peers and, that the, United States will be a majority minority nation by 2065. Yet many people recognize neither their own level of intercultural competence nor the several subconscious biases that may be affecting them.

In this webinar, we will explore two popular tools to gauge individual multicultural skills and attitudes. Useful for students, staff, faculty, and community partners alike, these tools address both conscious and subconscious components of the way we think and act around people who are different from us in meaningful ways. We will also discuss some of the ways these tools can be applied on and off a university campus.

Dave Lassen, MA. is the Global & Community Engagement Coordinator in the College of Human Sciences at Oklahoma State University.

He works to expand and sustain equitable service-learning and community engagement opportunities wherever possible. In doing so, he helps faculty, staff, and students prepare to learn from and navigate
